ings cleaned.

■ **Look for wear and tear in what you just can't give up and repair it if possible.** Some damage, depending on the type of room, may include worn or torn fabric, a cracked piece of tile or broken ceramic figure, linoleum that is lifting, loose drawer pulls or towel racks, wobbly table legs, unraveling wicker, leaking hoses, loose woodwork and nicks in the paint.

Restoring beauty to a room doesn't have to be expensive. Many household repairs require only a tube of good adhesive. You will be amazed to find that even if you need to glue, seal or bond a wide variety of materials, you really don't need a special adhesive for each job. A one-part adhesive that dries to a clear, rubbery, flexible, waterproof finish is usually the best bet for most projects.

One of the strongest and most versatile one part adhesives available is Amazing GOOP All Purpose adhesive by Eclectic

Products Inc. It replaces glues, paste, rubber contact cement, silicone and patch kits. It is unsurpassed for permanently repairing, mending, sealing and for bonding two different materials together. It won't break, crack or chip under pressure. It dries clear and can be painted to maximize its resistance to UV rays.

The rubbery, flexible, waterproof nature of adhesives like Amazing GOOP All Purpose is great for creating a protective coating for vinyl dish racks (so the underlying metal won't wear through and rust) and worn lamp and appliance cords. Also use it to seal drainpipes and sink and washer hoses.

"If you are repairing a leaky hose, for example," says Dr. Omar Tiba, Eclectic Products' Chemist, "the adhesive must remain flexible after drying or it will just crack or chip off. It also needs to be waterproof and UV-resistant."
