

AUDIBEL

A Hearing Solution Made With You In Mind.

Don't Want or Need Hearing Aids?

Still have a problem understanding occasionally?
Try Audibel's Newest, Smallest High Tech Hearing Aid...It's Virtually Invisible!

3 Channels, 7 Bands

AUDIBEL Audibel is so confident that new users will love the sound of this hearing aid that we're offering a **FREE** in office demonstration on this new hearing system.

ACTUAL SIZE

Open.

Together, HearStic's open fit and digital technology is an ideal blend of amplified and natural sound. This provides a more realistic sound quality that makes listening and understanding more enjoyable and comfortable.

HearStic's soft, flexible Earbud fits inside your ear canal. Its unique fin design provides a secure fit, yet keeps most of the sound passageway unobstructed.

This "open" fitting lets many sounds pass through naturally, without being amplified. This makes the user very comfortable.

Comfortable.

HearStic's openness and high fidelity are one part of its comfort advantage. HearStic's tiny size and feather-light design of both the Earbud and electronics also enhance comfort.

With less hardware between you and your world of sound, there's less to adapt to as you begin experiencing improved hearing. In fact, people wearing HearStic say that with added acoustic and physical comfort, they easily forget there is anything on their ears.

Easy.

HearStic's placement between the head and the top of the ear maximizes its sound reception capabilities and takes advantage of the outer ear's largest hiding space.

HearStic has no switches or buttons to worry about. Simply insert the batteries, put them on and start hearing better.

With its unique Earbud design, HearStic doesn't need custom, factory-made molds. Now you can have your hearing tested and HearStic computer-configured to match your exact hearing requirements all in one office visit.

Same Day Hearing Aids
