CATARACT & LASER INSTITUTE

www.midfloridaeye.com

New AcrySof® ReSTOR® lens, now available for the first time at Mid-Florida Eye, gives patients a greater range of vision following cataract surgery.

This revolutionary lens, inserted during cataract procedures to replace the eye's clouded lens, offers the possibility of no dependency on glasses in 80% of all patients.

Our Cataract & Implant Specialists have successfully performed more than 50,000 no-needle, no-stitch cataract procedures and helped pioneer the techniques and equipment used by physicians worldwide.

**Ask us how you can ReSTOR®
your best vision.**
